AOP5500

DUAL AUXILIARY ANALOG OUTPUT PANEL

Art. 71.61.5070

Controls and Features

- 2 XLRM connectors, front panel mounted
- 2 UP/DOWN buttons, for language selection
- 2 LCDs

Description

The AOP5500 Dual Auxiliary Analog Output Panel is part of the TCS 5500 digital conference system. It allows connection of two balanced line level analog signals (input to a mixing panel, power amplifier, cassette tape recorder input, etc.)

It provides 2 balanced transformer coupled XLR outputs, 2 UP/DOWN channel selectors with LCD.

The unit is rackmountable and needs to be connected to two output ports of an INT5500 (to be provided seperately).
