

### Controls and Features

- XLR connectors, front panel mounted
- 2 Rotary volume controls
- 2 ON/OFF buttons, with associated LEDs

### Description

The AIP5500 Dual Auxiliary Analog Input Panel is part of the TCS 5500 digital conference system. It allows connection of two balanced line level analog input signals (output of a mixing panel, VTR sound, CD, cassette tape recorder output, etc.)

It provides 2 balanced transformer coupled XLR inputs, 2 rotary level adjustments and 2 ON/OFF switches with LED controls.

The unit is rackmountable and needs to be connected to two input ports of an INT5500 (to be provided separately).

The signal provided at the input will be available on the floor.channel

### Specifications

Technical Data	
Dimensions (mm)	43 (h) x 483 (w) x 25 (d)
Weight (g)	+/- 350
Input Sensitivity	-10dBu (245 mV)
Power Supply	Powered from the INT5500 in the rack
Colour	RAL7021 (Matt Black)
Front Plate	Steel
Part Number	71.67.5060
